EDUCATION

College

PSG College of Technology M.Sc (Integrated) Software Systems

Present

CGPA: 5.97 / 10

High School

Bharathi Matriculation School, Vijayamangalam, Erode

June 2022

Percentage: 86.3

SKILLS

Languages: Python, C++, Java, Javascript, HTML, CSS

Platforms: Linux, Windows

Tools: Git, Figma, Postman

Databases: MySQL, MongoDB

Frameworks: JAVAFX, NodeJS, ExpressJS, Flask

PROJECTS

Drive Craft  Java, JavaFX, MySQL, HTML, CSS.

(Present)

- It is a Java-based automobile design application that allows users to create, customize, and visualize unique vehicle designs.
- Using JavaFX, I developed an interactive UI for real-time 3D modeling
- Java business logic to calculate performance metrics.
- Implemented JWT authentication and automated Emails

Dress Up  HTML, CSS, JavaScript, Python, NodeJS, ExpressJS, MongoDB

- An web based application where users can upload a photo of their pants or shirt, and the app suggests optimal color combinations for the given clothing item
- In addition to style recommendations, it provides information on where to purchase the suggested items
- Includes a wish list feature for easy tracking of desired products and share your products to others

GamesVille ChatBot  Python

- Is a chatbot that answers user queries based on scraped website content and generates responses using the "gemini-pro"
- It processes scraped data using embeddings and stores them in a FAISS vector database for efficient retrieval.

Verano-24  Python

- Was a part of the Ministry Of Heavy Industries funded (MHAI) research project on the Development of Robotic Controller for Welding Application
- The Project aimed at developing a robot for precision metal welding to mitigate human exposure to high light emissions
- Trained a model to identify surface defects using a Kaggle dataset. Utilizing RESNET-18 and the Jetson AGX Orin

Data Struct Calculator  HTML, CSS, JavaScript

- A website users can dynamically input data to create and manipulate these structures, visualize the processes, and validate the properties of different algorithms
- The platform supports operations on data structures like Binary Search Tree (BST), Breadth-First Search (BFS), Depth-First Search (DFS) etc

AREAS OF INTEREST

- Web Development
- Supervised Learning
- Object Oriented Program
- Data Structures and Algorithms
