PROJECTS

• Online Home Appliance Service Center:

July 2023

(React.js, MySQL, Spring Boot)

An online home appliances service center project focuses on offering repair services for household appliances through a user-friendly website or app. Customers can easily book appointments, describe their appliance issues, and track repair progress. Qualified technicians are dispatched to homes, ensuring efficient repairs for appliances like washing machines and refrigerators

• Online Agricultural Loan Portal:

January 2024 – February 2024

(Vite-React.js, PostgreSQL, Spring Boot)

An online agriculture loan portal is a website that allows farmers to apply for loan through online by filling out this forms and uploading document. It offers different types of loans like crops and equipment loans to their needs. This website helps farmers check their eligibility levels, calculate loan amounts and track their application status. Farmers can manage their loan details and receive their important notifications through this website.
