

SUJITH CHANDRAN

+91 8248635260 ♦ Kotagiri, The Nilgiris

sujjuchander@gmail.com ♦ <http://linkedin.com/in/sujithchandran1>

OBJECTIVE

To seek an entry-level opportunity to apply my skills and abilities in an reputed organisation for professional and personal growth.

EDUCATION

Year	Degree/Certificate	Institute/School	CGPA/Percentage
B.E- ECE	Sri Ramakrishna Engineering College	Present (2021-25)	7.25
HSC	Kotagiri Public School	2020-21	70%
SSLC	Kotagiri Public School	2018-19	56%

SKILLS

Technical Skills C (Moderate) , Python (Basic), Embedded C (Basic)
Soft Skills Communication, Teamwork, Problem Solving
Software Known Matlab, Lab View, WPLSoft

EXPERIENCE

- Completed 14 days Industrial Training on basics of "INDUSTIRAL AUTOMATION" conducted by **Axis Global Institute of Industrial Training (AGIIT)**.

CERTIFICATION AND KEY COURSES TAKEN

- Completed the course "BACKEND WEB DEVELOPMENT USING MYSQL AND PHP" conducted by Sri Ramakrishna Engineering College.
- Completed Workshop on "Robotics & Its Industrial Application" conducted by Mukkudal Robotics in Association with IETE, Sri Ramakrishna Engineering College.
- Completed "Introduction to Python" Certified Course by Springboard offered by INFOSYS.
- Currently pursuing "Real Android App Dev" certified course in Udemy.

PROJECTS

Smart Spectacles With Safety Applications

The project aims to ensure individual safety and prevent unwanted recordings by using an IR receiver to detect hidden cameras. The device detects potential spying and alerts users, ensuring the safety of individuals from hidden cameras and other bugs, thereby preventing any exploits and ensuring overall security.

Languages & Tools Used: Arduino IDE, Proteus 8, Arduino Mini, IR Sensor, NEO 6m (GPS), SIM800L (GSM), Bluetooth Module.

Scaffold Maintenance System using ML Algorithm

The Scaffold maintenance system uses wireless sensors to monitor structural parameters like vibration, strain, and temperature, triggering notifications if they exceed thresholds. This proactive maintenance ensures safety and structural integrity of scaffold systems, revolutionizing the way scaffold structures are monitored and maintained.

Languages & Tools Used: Embedded C, Arduino IDE, Node MCU, Accelerometer, DHT11, BLYNK IoT.

EXTRA-CURRICULAR ACTIVITIES

- Participated in the event **“INNOVATION CODING CHALLENGE”** at Sri Ramakrishna Engineering College.
- Secured First Place in the event **“PROJECT EXPO”** in **“TRONEXUS-2022”** held at SNS College of Technology.
- Participated in the Quiz event **“FIXED”** conducted by Google Developer Student Club of Sri Ramakrishna Engineering College.
- Participated in the events **”ENGINE ASSEMBLY- WORKSHOP”** and **“PAPER PRESENTATION”** in **“TRONEXUS-2022”** held at SNS College of Technology.

PERSONAL DETAILS

Languages Known English, Tamil, Badaga
