EDUCATION

Amrita Vishwa Vidyapeetham B.Tech in Electronics and Communication Engineering	Coimbatore, India 8.25/10
Suguna PIP School CBSE Class XII Joint Entrance Examination CBSE Class X	Coimbatore, India 90% 96.48 Percentile 90%

TECHNICAL SKILLS

Languages: C++, C, Python, SQL, Javascript, Kotlin, XML, Verilog, VHDL

Frameworks & Libraries: Node.js, Express.js, React.js, MongoDB(Mongoose), Firebase

Tools: Jupyter Notebook, Git, Github, Postman, MongoDB Compass

EXPERIENCE

Intern at SATCARD, Indian Institute of Technology, Palakkad Jun 2024 – Aug 2024

Tech Stack: MicroPython, Python, scikit-learn, statsmodel

- Calibrated Pt100 sensors and interfaced them with Raspberry Pi Pico using **MicroPython**.
- Applied machine learning models to improve sensor accuracy. Deployed the system in field environments for durability testing.

Software Developer Intern at Sri Sathya Sai Seva Organization

Tech Stack: Next.js, Tailwindcss, React, Firebase, Firestore

- Developed a **Firebase-powered Next.js application** to manage registrations, live grading of 750+ participants, and district-wise leaderboards for 36 events.
- **Optimised performance** using dynamic routing, cached logins, and Firestore integration, enabling real-time collaboration for 70+ judges.

PROJECTS

Genjs-cli

Tech Stack: Node.js, Commander.js, Inquirer.js

- A CLI tool that generates **React** and **Node** projects based on user-generated prompts, published on npm (**200+ downloads**)
- Provides a **command-line interface** where users input their API key and customize prompts to create files locally.
- Ensures secure API key management and offers flexibility in file generation, supporting a variety of use cases.

MarketPlaceWeb

(Ongoing)

Tech Stack: React.js, Tailwind CSS, Next.js

- Collaborated with a team of five to develop a real-time **management system** for Amrita Vishwa Vidyapeetham, covering canteen, stores, and other campus facilities, aimed at streamlining operations and reducing queues
- Integrated **RESTful APIs** to dynamically fetch outlet details, menu items, and manage orders.

Tea Leaf Disease Classification App

[GitHub Link](#)

Tech Stack: Kotlin, XML, TensorFlow Lite

- Designed an Android application aimed at assisting farmers in detecting diseases in tea leaves. The app utilizes **Kotlin** and **XML** for front-end development, ensuring a responsive and intuitive user interface.
- The core functionality revolves around an ensemble of three models: **MobileNetV2**, **Xception**, and **DenseNet**, which collectively achieved an impressive 87.5 percent accuracy rate in classifying leaf diseases based on images captured by users.

ACHIEVEMENTS

Solved 500+ problems across various platforms like Leetcode, GeeksforGeeks, Codeforces, and CodeChef.

[Profile](#)

CodeChef: Max rated as 3-Star

[Profile](#)

Codeforces: Max rated at 1080
