PROFILE

Proficient in developing dynamic, user-friendly applications using React.js, HTML, CSS, and JavaScript. Skilled in backend development with Node.js and Python, and experienced in managing scalable databases with MongoDB. Strong foundation in C and versatile programming expertise for end-to-end software solutions.

TECHNICAL EXPERTICE

Front End :HTML , CSS ,Javascript , React .js

Back End : Node.js , python

Database : MongoDB , Firebase

Language : C , JAVA

OS : Windows

Tools : VS Code, Figma, Canva,Intellij

PROJECTS

1.E-commerce website for textiles

React JS, Node JS, Express, Mongo DB

- Frontend (React.js): The e-commerce website's user interface will be built using React.js for a dynamic and responsive shopping experience.
- Backend (Node.js & Express.js): The backend will handle authentication, order processing, and communication with the database using Node.js and Express.js.
- Secure APIs will be created to manage users, products, and payments.
- Database (MongoDB): MongoDB will store user data, product details, order history, and inventory.

2.Food Recipee App

React js,Node.js,MongoDB

- Key features of the app include user authentication, enabling secure login and personalized recommendations. Users can search for recipes, view details, and save their favorite foods for easy access later.
- Additionally, an order system allows users to place food orders directly from the app, integrating a cart and payment gateway for seamless transactions.
- This MERN-based recipe app can serve as a one-stop solution for food lovers, combining recipe exploration, personalized favorites, and online food ordering into
- a single, easy-to-use platform

3.Apple product clone website

HTML , CSS ,Animation

- 1.Responsive Design: Create a visually appealing and responsive website using HTML and CSS to mimic the clean and minimalist design
- 2.Interactive Features: Use JavaScript to add interactive elements such as product carousels, animations, dropdown menus.
- 3.Product Showcase: Develop detailed product pages that display specifications, images, and pricing, while enabling smooth navigation and transitions
