EDUCATION

- **PSG College of Technology, Coimbatore** 2022-2024
Master of Computer Applications CGPA: 7.02
Relevant Coursework: Advanced Web Development, Database Management, Software Engineering
- **PSG College of Arts and Science, Coimbatore** 2019-2022
B.Sc. Mathematics with Computer Applications CGPA: 8.2

EXPERIENCE

- **PSG Software Technologies** 01,2024 - 11,2024
Software Engineer (Intern) Coimbatore
 - Developed the "Programme Regulations and Schemes" module from scratch, integrating into the existing Laudea product to manage and version academic regulations and schemes.
 - Designed and implemented a backend API architecture using the MERN stack, enabling efficient data handling and storage.
 - Built a dedicated workflow for importing program schemes from Excel, streamlining bulk data processing for academic operations.
 - Integrated Keycloak for authentication and authorization, enabling secure role-based access and detailed tracking of user activities.
 - Collaborated with team members to seamlessly integrate the module with existing systems, ensuring smooth data flow and interoperability.
 - Created advanced workflows for stakeholders to add, edit, and approve regulations, schemes, and Outcome-Based Education (OBE) mappings, ensuring compliance with academic standards.
 - Implemented an automated notification system that sent email alerts during state changes, improving communication among stakeholders.
 - Transformed a complex manual academic workflow into an efficient digital system, leading to significant operational improvements and error reduction for PSG CAS and PSG ITech institutions within six months.

Achieved a 40% reduction in processing time for academic workflows and improved stakeholder satisfaction through automation and seamless collaboration.

PROJECTS

- **Expense Tracker** /Github/
An online tool to track daily spending and visualize expenses by category.
 - Developed an online expense tracker utilizing Django, HTML, and CSS; included category-specific visualizations that enhanced user financial insights and reporting accuracy by 30% compared to previous manual tracking methods.
 - Enhanced the platform with a user-friendly interface and robust backend for better financial management.
- **Getbonafide** /Github/
Bona Fide Certificate Management System with a digital approval workflow.
 - Designed a React Native application to automate bona fide certificate approval workflows, minimizing manual intervention.
 - Created a backend in Node.js with MongoDB to manage user data and approvals seamlessly.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Java, Python
- **Frontend Development:** React.js, HTML, CSS
- **Backend Development:** Node.js, Express.js, Spring Boot, Django
- **Databases:** MongoDB, MySQL, SQLite

CERTIFICATIONS

- Completed Online Certificate Course on “**The Joy of Computing Using Python**” from NPTEL which comprises of basics of Python with a consolidate score of 78%. /Certificate/
- Certificate of merit for **web development** conducted by Gobi Arts and Science College, Erode. /Certificate/
