ABOUT ME

I'm an aspiring developer with skills in [MERN STACK], eager to contribute to innovative projects. A collaborative and quick learner with a passion for staying updated on tech trends. Dedicated to delivering high-quality code for successful project outcomes.

EXPERIENCE

- Completed a comprehensive MERN Stack development course at SmartCliff, Coimbatore, and successfully implemented knowledge through the completion of two projects during my internship tenure.
- I worked in Front End development at Montbleu Technologies Pvt Ltd., Coimbatore.

PROJECT

OpenCV ATM Security System

Enhancing traditional ATM security through facial recognition. This Python project, developed in PyCharm using Tkinter, focuses on user identification and authentication by using facial recognition as the key. Compatible with Windows 10.

SmartCliff Web App

I have done website for smartcliff using the front end technologies like React-js along with mui and backend mysql and mongodb

MOTIV AI

I have completed my first live project for the montbleu which is a static website for the client using React-js

Connect - ATS

As my second live project developed with React-js Frontend, Node-js Backend, and Mongo Data base which is i have provided full stack support.

LANGUAGE

English
Tamil
Malayalam

CERTIFICATION

- Completed a 3-month Full Stack Development course at Cispro Placements, Coimbatore.
