PROFESSIONAL EXPERIENCE

SUMADHURA INFRACON PVT LTD

MAR 2024 – PRESENT

Trainee Developer

- As a Front-End Developer, I worked on the development of a robust Visitor Management System (VMS) to efficiently track and manage all visitors for our company, enhancing security and streamlining the check-in process.
- Designed and implemented user-friendly interfaces using modern front-end technologies to ensure a seamless user experience.
- Improved front-end performance, resulting in faster load times and smoother user interactions.
- Ensured the VMS was fully responsive, providing an optimal experience across various devices and screen sizes.
- Integrated data visualization tools to present visitor statistics and insights effectively.
- Worked closely with back-end developers to integrate front-end components with server-side logic and APIs.
- Conducted thorough testing and debugging of front-end code to ensure high quality and reliability.
- Gathered and incorporated user feedback to continually enhance the VMS interface and functionality.

EDUCATION

DR G R Damodaran college of arts and science Coimbatore

2021-2023

Course: Master of Computer Applications

SKILLS

- | | |
|----------------|----------|
| • HTML | React.js |
| • CSS | Node.js |
| • JavaScript | MongoDB |
| • TypeScript | Git |
| • Tailwind CSS | MUI |
| • Next.js | Recoil |

PROJECTS

Weather app: Dynamic weather application using HTML, CSS, JavaScript, and React. Integrated a weather API to fetch real-time weather data, demonstrating proficiency in API integration(using the open-weather API) Implemented user-friendly features such as location-based weather updates, interactive UI elements, and forecast predictions.

Shoe-shop: Feature-rich eCommerce platform with React frontend, Node.js backend, MongoDB database, secure authentication, unique carts, and responsive design. Utilized responsive design principles to guarantee a consistent and user-friendly experience across various devices.

Vehicle Management System: The Vehicle Management System is a comprehensive software solution designed to efficiently manage and monitor the maintenance of vehicles. Users can sign up, log in, and seamlessly track the maintenance status of their vehicles with real-time updates. You can interact with a live model of the Vehicle Management System. Visit <https://vms-tau.vercel.app/> to access the system and explore its features.
