As a final-year Computer Science student passionate about Full Stack Development, AI/ML, Software Development, Graphic Design, and UI/UX, I have gained hands-on experience through real-life projects. My skills include front-end and back-end development, creating user-friendly interfaces, and developing AI/ML models. I focus on delivering functional and visually appealing solutions, while continuously learning and staying updated with industry trends to contribute to innovative tech projects.

Education:

Amrita Vishwa Vidyapeetham – B-Tech CSE
Coimbatore

2021 - Present

Holy Cross Matriculation Higher Secondary School – 10th and 12th
Salem

2019 – 2021

Projects:

XAI - eXplainable Artificial Intelligence

2023 - 2024

It explains how each link in a convolutional neural network works to fetch the final output by visualizing the layer wise outputs.

Heart Disease Prediction

2023 – 2024

It is a Machine Learning based heart disease prediction program, where multiple models are trained to get the highest accuracy possible.

Friend Matcher

2021 - 2022

The FriendMatcher project is a hypothetical web-based platform that aims to connect individuals with compatible friends based on their shared interests, hobbies, and personality traits.
