Software Engineer

Seeking a Software Engineer role to apply expertise in Java, JavaScript, React.js, PHP, and WordPress for developing scalable web solutions.

WORK EXPERIENCE

Forbes Advisor • 12/2022 – 12/2024

Associate Software Engineer

- Developed and managed WordPress websites for USA Today, CNN, and Forbes Advisor, creating custom Gutenberg blocks, themes, templates, and plugins using PHP, JavaScript, and React.js.
- Implemented responsive UI designs with Tailwind CSS and maintained code integrity using Git for version control.

Full Stack Developer Internship

- Selected for an internship through VIT College, where I learned to develop WordPress sites using PHP, JavaScript, and React.js.
- Successfully transitioned to a full-time Associate Engineer after completing the internship.

EDUCATION

B. Tech in Computer Science and Engineering Specialization with Bioinformatics

Vellore Institute of Technology • Vellore • GPA: 7.89

PROJECTS

React Map Application

- Developed an interactive map application using React.js, Leaflet.js, and OpenStreetMap.
- Implemented a search functionality with the OpenStreetMap API, allowing users to find locations dynamically. Integrated real-time map updates, ensuring the map adjusts based on user input.

Bus Reservation System

- Developed a Java-based bus reservation system that allows users to dynamically book seats.
- Applied Object-Oriented Programming (OOP) principles, including encapsulation and modular design.
- Implemented seat availability checks based on travel date and bus capacity before confirming bookings.

SKILLS

Programming Languages: Java, JavaScript, Python, PHP, CSS, HTML

Frameworks & Libraries: React.js, Node.js, Springboot, Tailwind CSS, Laravel

Tools & Platforms: Git, Jira, WordPress

Database: Mysql

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOPS), Agile Methodology, Web development, Database Management
