Profile

To design and implement efficient deployment pipelines, automate infrastructure, and ensure scalable, reliable systems. Focused on bridging development and operations to deliver high-quality software solutions. Dedicated to optimizing performance and enhancing security.

Language

- Tamil
- English

Technical Skill

- Python
- C
- Java
- HTML,CSS, JavaScript
- MySQL
- Tools:VisualStudio,Canva,

Soft Skill

- Adaptability
- Teamwork
- Creativity
- Problem Solving

Education

Undergraduate Aug 2022-Present

B.Sc.Computer Technology

KG College of Arts and Science

School

CMS Matriculation Higher Secondary

School

HSC 68.16% June 2021-Mar 2022

SSLC 60.2% June 2019-May2022

WorkShop

Organized by: AWS Acedmic and

Kgisl Institution

Description: Participated in AWS DeepRacer League, gained machine learning experience, learned to develop reinforcement learning models for autonomous vehicles., understanding reward functions, model optimization, and hyperparameters.

Projects

Creators Career Development Website

- VisualStudio Code tools & languages you used like HTML, CSS, JavaScript, Node.js, MongoDB
- Customizable creator profiles showcasing skills, projects, and experience.
- Implemented secure user registration, login, and password management.
- Helped creators professionally showcase their work, grow their network, and access career resources efficiently.

Harley davidson website

No.of.days: 2

- Description Designed and developed the Harley-Davidson website, showcasing iconic motorcycles and riding experiences.
- Implemented e-commerce functionality and interactive features to engage customers and drive sales.
- Utilized responsive design and user-centered approach to create a seamless online experience across devices.

Line Follower Robot

No.of.days: 6

- During the South Indian Hackathon (SIH), I showcased a working model of an "Line Follower Robot".
- Designed and developed an intelligent robot that uses sensors and microcontrollers to detect and follow a marked line, demonstrating autonomous navigation and precise control.
- Utilized Arduino to create a robust and adaptable system, showcasing my skills in robotics, programming, and problem-solving

Participations

- Participated in "Meme Creators" Organized by Rathinam college of Arts and Science on 2022
- Participated in "Safetython" Organized by Kumaraguru college of technology and Traffic Management on 2023.
