

VISWANATH SU

Coimbatore, Tamil Nadu

+91-8072062577 | viswanath.2102257@srec.ac.in | [Linkedin](#)

Summary

Aspiring Machine Learning Engineer and Python Developer with a strong foundation in computer science, data structures, and deep learning frameworks such as TensorFlow, PyTorch, and Scikit-learn. Skilled in developing scalable software architectures and deploying predictive models in real-time environments. Adept at collaboration with cross-functional teams and product stakeholders to align with business goals. Experienced in handling large data sets, performing data modeling, and ensuring compliance with industry standards. Strong analytical and problem-solving mindset, focused on continuous growth and delivery of AI-driven technical solutions.

Education

Sri Ramakrishna Engineering College — B.E. in ECE (CGPA: 8.08)

Coimbatore | Jan 2021 – May 2025

Skills

- **Languages & Tools:** Python, C, MATLAB, SQL, HTML, CSS
- **Frameworks:** OpenCV, Mediapipe, pytsx3, Flask, Scikit-learn
- **AI/ML:** Neural Networks, Classification, Data Preprocessing, Deep Learning, NLP, Predictive Modeling
- **Data Tools:** Pandas, NumPy, Power BI, Data Cleaning, Data Modeling
- **Dev Tools:** Jupyter Notebook, ADS, Git

Projects

Hybrid Beamforming for 5G MIMO Based on Deep Learning

Designed a DNN-based hybrid beamforming system with MF, ZF, RZF, and HRZF algorithms. Demonstrated software architecture scalability and improved BER and throughput.

Early Detection of Chronic Kidney Disease (CKD)

Built an end-to-end machine learning pipeline using Python (Flask, Pandas). Used real patient data sets to develop a 92% accurate predictive model with a user-facing software prototype.

AI Voice Assistant (Python)

Created a voice-based AI assistant with NLP features and system automation. Ensured secure command processing and adherence to basic compliance protocols.

Gesture-Based Camera Control

Developed gesture recognition system using Mediapipe & OpenCV. Showcased real-time interaction with software components through intuitive hand gestures.

Customer Churn Analysis

Used Power BI for data analysis and visualization. Produced interactive dashboards leading to actionable business insights and improved customer retention.

Certifications

- | | |
|--|--|
| - AWS APAC – Solutions Architecture, Forage | - Verizon – Cloud App Security, Forage |
| - Deloitte – Data Forensics & Analysis, Forage | - TATA – Data Visualization for Business, Forage |
| - PWC – Power BI & Data Cleaning, Forage | - SQL Basics – Skillrack |

Leadership & Volunteer Experience

Associate Editorial Student Lead, SREC (Aug 2024 – May 2025)

Led a team of 7 in content creation, design, and publishing for the ECE Chronicle 2024. Demonstrated cross-departmental collaboration, content planning, and problem-solving.
