

GOKUL KRISHNA A

.NET Developer with hands-on experience in building scalable web applications using **ASP.NET Core**, **Entity Framework**, and **Dapper**. Skilled in **Clean Architecture**, **JWT authentication**, and optimizing **SQL**/database performance. Passionate about delivering high-quality solutions with a focus on performance, **security**, and maintainability.

EDUCATION

Bannari Amman Institute of Technology, 2020–2024,
Bachelor of Engineering in
Computer Science (**BE-CSE**),
CGPA : 7.40.

TECHNICAL SKILLS

.NET Core Framework
.NET Core (Restful Api)
ASP.NET MVC
Entity Framework (EF)
C# Programming
SQL & Oracle
JavaScript (ES6+)
jQuery
Ajax
JWT Authentication
LINQ (Integrated Query)
HTML & CSS
Bootstrap 5
C++ Programming

TOOLS

Git
Swagger
SignalR
Toad For Oracle
Visual Studio
Visual Studio Code

PROFILES

PERSONAL SKILLS

Problem Solving
Communication

WORK EXPERIENCE - Sakthi Infra Tex Group - Erode
Role: DotNet Developer (May 2024 – Present)

- Developed a web application using **ASP.NET Core MVC**, enhancing performance and scalability through modern frameworks.
- Implemented **Clean Architecture** with distinct layers (Presentation, Application, Domain, Infrastructure) to promote separation of concerns, resulting in improved maintainability and scalability.
- Integrated secure **authentication** and **authorization** protocols using JSON Web Tokens (**JWT**), ensuring robust data integrity and protection of sensitive information.
- Performance Enhancement Utilized **IMemoryCache** in .NET MVC to boost performance and reduce load times, enhancing user experience.
- Employed **Entity** and **Dapper** for data access, significantly optimizing query performance and improving overall application efficiency.
- Developed and managed a **RESTful API** for a **CRUD** application using Swagger, ensuring comprehensive documentation and streamlined testing.
- Utilized **LINQ** for efficient data querying and manipulation, enhancing code readability and maintainability across various data sources.
- Integrated **AJAX** with **jQuery** to provide real-time updates in web applications, minimizing page reloads and significantly enhancing user engagement.

PROJECTS - InfraHub

Developed a comprehensive **ERP application** for a textile company, integrating functionalities such as user attendance tracking, Regulatory Compliance Document Concerns, and inventory management with buyer-specific details.

- Utilized **.NET 8** and **Entity Framework** for backend development, ensuring efficient data handling and robust **CRUD** operations..
- Implemented secure user **authentication** and **authorization** protocols using **JWT**, ensuring robust security and data integrity across the application.
- Integrated **RESTful APIs** to facilitate seamless data exchange between different modules, improving operational efficiency and enabling third-party integrations.
- Optimized **SQL queries** and **stored procedures** for enhanced database performance, resulting in faster data retrieval and reduced load times.
- Employed **IMemory** caching techniques to enhance application performance and minimize database strain, leading to quicker response times for users.
- Implemented dynamic features using **JavaScript**, **Ajax**, and **jQuery** to improve interactivity and responsiveness of the application.
- Designed and developed a responsive user interface utilizing HTML, CSS, and **Bootstrap 5**, enhancing user experience and accessibility across devices.
