OBJECTIVE

I am a motivated and detail-oriented Mechanical Engineering graduate with a strong interest in automation and design. Adept at collaborating with development teams and implementing practical engineering solutions. I am passionate about innovation and eager to contribute to the mechanical industry with hands-on experience and a continuous learning mindset.

EXPERIENCE

2023/11 - 2024/01

Sathuragiri Motors – Mechanical Engineering Intern

- Collaborated with the service department to implement automation processes that enhanced efficiency in daily maintenance and repair workflows.
- Took initiative in identifying repetitive manual tasks and suggested automation strategies using basic mechanical control systems.
- Supported the core development team by assisting in testing and evaluating automation features in live environments.
- Participated in the design and planning of automated tools for internal service tracking and customer feedback systems.
- Gained hands-on experience in troubleshooting mechanical components and ensuring optimal performance of automotive systems.

PROJECT

Design And Fabrication of Multipurpose Agriculture Machine

This project work is focused on the design and fabrication of multipurpose equipment which is used for land preparation ,sowing ,fertilizing ,levelling and weed removal process .The multi - crop planter has the capability of delivering the seeds precisely with uniform depth in the furrow and also with uniform spacing between the seeds .The seed planter consist of the main frame , adjustable handle ,seed drive wheels ,seed tube .Seed metering disc was designed to be interchangeable to allow for sowing of the different varieties of seeds .The multipurpose agricultural equipment is very simple to use ,the various adjustments are made with ease ,and it is maintenance free.
