PROFILE

Computer Science undergraduate (B.E.) with hands-on experience in data science, machine learning, predictive modeling, and business intelligence. Skilled in using Python, SQL, TensorFlow, and visualization tools like Power BI to uncover insights, build analytical models, and solve complex business problems. Eager to leverage analytical rigor to support high-impact decision-making.

EDUCATION

B.E.Computer Science

Jansons Institute Of Technology

2021 – 2025

CGPA: 8.1

HSC / Computer Science

Akshaya Academy Matriculation Higher Secondary School

2020 – 2021

Percentage: 82

SSLC

Akshaya Academy Matriculation Higher Secondary School

2018 – 2019

Percentage: 80

LEADERSHIP

Intel OneAPI

Student Ambassador

Jan 2024 – Feb 2025

TECHNICAL SKILLS

Language: Python, SQL, Java, R (basic), HTML, CSS, JavaScript

Frameworks/Libraries: Pandas, NumPy, Seaborn, TensorFlow, Scikit-learn

Analytics Tools: Power BI, Excel, Seaborn, DAX, MySQL, PostgreSQL, Apache Spark (basic)

Concepts: Machine Learning, Forecasting, Predictive Analytics, Model Training, Cross-validation, Deep Learning, Data Modeling

CERTIFICATES

- Java Full Stack by TalentNext Wipro
- UI/UX Design by Tutedude
- User Experience by Accenture

LANGUAGES

English

Tamil

INTERNSHIP

Frontend developer

Elgi Equipment Pvt.Ltd

Oct 2023 – Feb 2024

- Developed responsive web applications using HTML, CSS, and JavaScript with cross-browser compatibility.
- Built wireframes and prototypes in Figma and Adobe XD; collaborated using Git, GitHub, and VS Code.

Frontend developer

Yectra Technologies Pvt.Ltd

Jul 2024 – Aug 2024

- Created mobile-friendly web interfaces; supported UI enhancements and consistent styling across devices.
- Contributed to enhancing user experience and supporting front-end development.

PROJECTS

Supermarket Analysis

Python, Power BI, Excel, SQL, Data Modeling, Jupyter Notebook

- Conducted end-to-end analysis on supermarket sales data to identify peak hours, product performance, and store trends. Built interactive Power BI dashboards with KPIs and visualizations to support retail decision-making.

Social Media Trend Analysis

Python, Excel, Seaborn, PowerBI, DAX, PostgreSQL, visualization, Data Modeling

- Developed a dynamic Power BI dashboard by integrating multiple PostgreSQL data tables to analyze social media trends, hashtag popularity, user sentiment, and mental health impacts using advanced SQL and interactive visualizations.

Bitcoin Prediction

Python, Intel® OneAPI toolkit, Intel® OneDAL toolkit, Intel® Data preprocessing toolkit

- Developed a Bitcoin price prediction model using deep learning techniques like RNN, leveraging Intel® OneAPI and OneDAL for efficient training and preprocessing; implemented data-driven analysis in Python to forecast trends and support investment strategies, risk management, and market sentiment analysis.
