

PRANAV R

SOFTWARE DEVELOPER | PYTHON DEVELOPER | DATA ANALYST

pranavravi097@gmail.com | +91-9942715288 | LinkedIn: linkedin.com/in/pranav-ravi-55a1a2340
Coimbatore, Tamil Nadu | Open to Relocation

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate with hands-on experience in Python development, web applications, and machine learning. Proven track record in delivering real-world solutions through freelance projects and technical implementations. Expertise in automation, data analysis, and security scanning applications. Seeking entry-level Software Developer/Data Analyst position to contribute to innovative technology solutions.

TECHNICAL SKILLS

Programming:

Python, SQL, JavaScript(basic), HTML, CSS

Frameworks:

Flask, Selenium WebDriver

Libraries:

NumPy, Pandas, OpenCV, Matplotlib, Scikit-learn

Tools & Databases:

Git, MySQL, VS Code, Jupyter Notebook, Excel, Power BI

Core Concepts:

OOP, REST APIs, Web Scraping, Machine Learning, Data Analysis, Automation

Soft Skills:

Problem Solving, Debugging, Team Collaboration, Communication

EDUCATION

Bachelor of Science - Computer Science

Sri Ramakrishna College of Arts and Science, Coimbatore
CGPA: 7.0/10 | Graduated: 2025

Higher Secondary Certificate

PSG Sarvajana Higher Secondary School
CGPA: 7.0/10 | 2020-2022

CERTIFICATIONS

- Data Science and Machine Learning - YBI Foundation
- Introduction to Unix - Infosys
- Data Structures in C - Skill Rack
- TCS ION Career Edge Young Professional Course

PROFESSIONAL EXPERIENCE

Python Developer (Freelance)

Multiple Clients

2024 - Present

- Developed custom Python applications and automation solutions for diverse client requirements
- Implemented data processing and analysis solutions using Python libraries
- Delivered projects within specified timelines while maintaining code quality and documentation
- Collaborated with clients to understand requirements and provide technical solutions

Data Science Intern

YBI Foundation

2024

- Completed comprehensive data science and machine learning internship program
- Applied statistical analysis and machine learning algorithms to real-world datasets
- Developed predictive models using Python and scikit-learn
- Created data visualizations and reports for stakeholder presentation

KEY PROJECTS

Cyber Scope - Website Security Scanner

Tech Stack: Python, Flask, Selenium, HTML/CSS, REST APIs

- Engineered comprehensive web security scanner identifying SSL vulnerabilities, HTTP header misconfigurations, and outdated scripts
- Automated vulnerability assessment using Selenium WebDriver and Python Requests library
- Implemented automated PDF report generation and email notifications via SMTP integration
- Designed responsive web interface using Flask framework with real-time scanning capabilities

Eigen Vision - Face Recognition System

Tech Stack: Python, OpenCV, NumPy, Scikit-learn, Matplotlib

- Built advanced facial recognition system using Eigenfaces algorithm with PCA for feature extraction
- Implemented MLP Classifier for accurate face classification and recognition
- Preprocessed image datasets using OpenCV with dimensionality reduction techniques
- Achieved high accuracy with impostor detection using confidence thresholds and statistical analysis
- Created comprehensive data visualizations including eigenfaces and accuracy metrics

LANGUAGES

English (Fluent), Tamil (Native), Malayalam (Fluent)
