PROJECT

SMS Mini Project - Android Studio

The SMS Mini Project in Android Studio involves creating an app that allows users to send and receive SMS messages. It includes features such as composing, sending, and viewing SMS, as well as retrieving incoming messages from the device. The project will utilize Android's SMS API to handle communication between the app and the device's messaging system.

SCRIPTIFY- convert handwritten document into digital using AI&OCR technology

Developed a Python-based web application that converts handwritten documents into editable and searchable digital text using Optical Character Recognition (OCR) technology. The system enhances document readability, enables text extraction from historical and modern handwritten sources, and includes features like using to language tamil & english, output download into pdf file, and a user-friendly interface.
