Education

United Institute of Technology

Bachelor of Technology in Artificial Intelligence and Data Science

Nov. 2021 – May 2025

CGPA : 8.2

R.K.Sree Rangammal Hr.Sec.School

Mathematics, Computer Science

June 2019 – May 2021

Marks : 85.11%

Experience

Grahaa Space

AI ML Intern

Mar 2025 – May 2025

Bengaluru, Karnataka

- Developed a YOLOv8-based deep learning model for detecting solar panels and identifying faults from aerial imagery.
- Achieved 92% precision and 89% recall, demonstrating high accuracy and reliability in real world testing scenarios.
- Preprocessed and annotated aerial datasets, fine-tuned model hyperparameters, and evaluated performance using industry-standard metrics.

VenPep Solutions

Backend Developer Intern

Aug 2024 – Sept 2024

Coimbatore

- Developed and improved web application backend features using Django, contributing to enhanced task management and user experience.
- Streamlined real-time monitoring by managing message queues via Rabbit Dashboard, improving operational visibility.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.
- Strengthened Python and Django skills by implementing best practices, debugging complex issues, and working on diverse backend modules.

Projects

Pixel Cipher - Steganography | *Python, Flask, Html, CSS, Pycharm*

- Developed a secure web application using Python and Flask to help users hide and extract data inside images, enabling privacy-focused communication.
- Implemented a dynamic and animated frontend with Html, CSS, and JavaScript to enhance user experience and improve usability for non-technical users.
- Created a password-protected data encryption workflow to prevent unauthorized access, improving the overall security of the application.

Inventory Management System | *Spring Boot, Java, MySql, Html, CSS, IntelliJ Idea*

- Engineered a robust full-stack inventory management system using Spring Boot and MySQL, enabling real-time stock tracking and minimizing human error in inventory operations.
- Built responsive, cross-browser compatible UI using HTML and CSS delivering an intuitive and accessible experience for users managing products, categories, and transactions.
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.
- Integrated real-time operations and database synchronization to enhance efficiency and ensure data accuracy across all inventory transactions.

Technical Skills

Languages: Python, Java, MySQL, HTML, CSS,

Technologies/Frameworks: Django, Springboot, Git, GitHub, Flask, Rest API, MVC Architecture

Developer Tools: VS Code, IntelliJ Idea, PyCharm, Eclipse, Oracle VirtualBox
