 Veerapandi, Coimbatore

OBJECTIVE

Data Insights Engineer with expertise in Python, SQL, and Machine Learning, leveraging data analytics to drive impactful decision-making and solve real-world problems. Skilled in delivering actionable insights through advanced visualization and predictive modeling.

INTERSHIPS

Data Analyst Intern – Exposys Data Labs

Jul 2023 - Aug 2023

Predicted diabetes with high accuracy using machine learning algorithms like Logistic Regression and Random Forest. Gained hands-on experience in data preprocessing, model training, and performance evaluation.

Web development Intern - Cognifyz

Aug 2023 - Sep 2023

Selected as a Web Development Intern at Cognifyz Technologies to work on scalable front-end and back-end solutions. Gained hands-on experience in integrating technologies to enhance user experience and system stability.

PROJECTS

Title: Prediction of Diabetes disease

Role: Data Analyst

Technologies used: Python, Pandas, Scikit-learn, Machine Learning

Description: Developed a machine learning model to predict diabetes based on health parameters. Focused on data preprocessing, feature selection, and improving model accuracy.

Title: IoT Driven Smart Saline Monitoring and Vital Surveillance system for enhanced Patient Safety

Technologies used: Arduino, IoT Sensors, Wi-Fi Module, Embedded C, Real-time Monitoring

Description: Designed an IoT-based system to monitor saline levels and vital signs like heart rate and temperature. Enabled real-time alerts to medical staff, enhancing patient safety and reducing manual intervention.

SKILLS

Programming Languages: Python, SQL

Technologies: Figma, Canva

ML Libraries: Numpy, Pandas, Matplotlib, Tensorflow, Seaborn

Data Visualization: Power BI, Tableau, MS Excel

Webpage Design: HTML, CSS

EDUCATION

B.Tech Artificial Intelligence and Data Science (CGPA-8.4)

(2021- 2025)

KGiSL Institute of Technology

Higher Secondary School (89%)

(2021)

St.John's Matric Hr.sec School, Coimbatore

Secondary School Leaving Certificate (83%)

(2019)

GSR Matric Hr.sec School, Coimbatore

HACKATHON

SIH (Smart-India-Hackathon) - 2023

TITLE: Sentimental analysis of social media presence

DESCRIPTION: Aggregating user interactions to gauge overall sentiment, leveraging natural language processing to detect positive, negative, or neutral tones.
