

VENKADESH R

AI DEVELOPER

iamvenkadesh3@gmail.com | 9342116064 | [Website](#) | [Linkedin](#) | [Github](#)

PROFILE

Aspiring AI & Data Science professional skilled in **Machine Learning, NLP, and Deep Learning**. Experienced in developing projects like **plant disease detection, toxic comment classification, and analytics dashboards**. Proficient in **Python, SQL, and visualization tools**, with hands-on deployment experience. Passionate about solving real-world problems through innovative, data-driven solutions.

SKILLS

Python | Data Visualization | Machine Learning | Deep Learning | Selenium | Power-BI | SQL | NLP | Deep Learning | Computer vision | Model Deployment | Web Scrapping | Google Analytics

PROJECTS

SIGN LANGUAGE RECOGNITION USING AI

Key Skills: Python, Tensorflow, Keras, OpenCV, Numpy

- Developed a **Sign Language Recognition System** to translate hand gestures into text/speech using computer vision and machine learning.
- Implemented **image processing techniques** (OpenCV/MediaPipe) for real-time hand tracking and gesture detection.
- Trained and evaluated a **deep learning model (CNN/LSTM)** to classify sign language gestures with high accuracy.
- Collaborated in **data collection, preprocessing, and model optimization** to improve recognition performance.

PLANT DISEASE DETECTION USING CV AND DL

Key Skills: Python, Tensorflow, Keras, OpenCV, Pandas, Streamlit

- Developed a **Plant Disease Detection System** using CNNs to classify leaf images into healthy or diseased categories with **92% model accuracy**.
- Aimed to Enhanced usability by integrating a **confidence score (%)** for each prediction and improving trust
- Processed and augmented a dataset of **54,000+ plant leaf images** to improve training efficiency and generalization And
- Reduced prediction time to **<1 second per image**, enabling **real-time disease identification**.

TOXIC COMMENT CLASSIFICATION USING NLP&DL

Key Skills: Python, Tensorflow, Keras, Scikit-learn, NLTK, Spacy, Streamlit

- Developed a **Toxic Comment Classification System** using LSTM and CNN models with an achieved accuracy of **91%** and F1-score of **0.88**.
- Processed and cleaned a dataset of 150,000+ user comments (multi-label: toxic, severe toxic, obscene, insult, threat, identity hate)**.
- Built a **Streamlet app** for real-time prediction, allowing users to **analyze single comments or batch data (CSV upload)**.

PROFESSIONAL EXPERIENCE

- Artificial intelligence -Code Alpha | Jan 2025 - Feb 2025 |
- Power BI – Microsoft and ICT Academy | Feb 2024 -Mar 2024 |
- Cyber Security -DevTown | Jan 2023 - Mar 2023 |
- Java Development – DevTown | Jan 2023 - Mar 2023 |

EDUCATION

B.E-COMPUTER SCIENCE AND ENGINEERING

DHANALAKSHMI SRINIVASAN ENGINEERING COLLEGE
PERAMBALUR

*2021 – 2025 | 78%

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

GUVI (HCL)

*Jan 2025 – Jun 2025

CERTIFICATES

- Artificial Intelligence – Code Alpha
- MICROSOFT POWER BI- ICT ACADEMY
- JAVA Basics -N.S.D.C and Skill India
